SACRAMENTO HOMELESS RESPONSE SYSTEM DASHBOARD

Ending Homelessness Together

www.sacramentostepsforward.org/data

INTERACTIVE AND DYNAMIC TOOL

This new interactive visualization tool provides population and demographic information on individuals experiencing homelessness and how the homeless response system is performing. Publicly accessible and updated quarterly, this resource provides timely information not captured in the bi-annual Point-In-Time count.

HOUSING AND SHELTERING TRENDS

The Dashboard shows trends on how many individuals are experiencing homelessness on a given day and throughout the year in Sacramento; their living situation, and outcomes on whether individuals are housed, sheltered, or continue to be homeless.
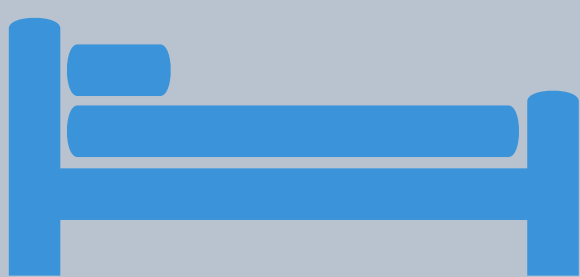

HOMELESSNESS ENTRIES AND EXITS

The Dashboard shows the number of individuals experiencing homelessness who are coming into and leaving homelessness, and will help inform the public to improve outcomes and positively impact the lives of individuals and families experiencing homelessness.

OUR DATA

This Dashboard uses data reported from Sacramento Continuum of Care's Homeless Management Information System (HMIS), utilized by many homeless service providers in Sacramento County.
