

System Performance Committee Agenda
 Thursday, August 27th, 2020 from 9-11 AM

I. Welcome & Introductions: Noel Kammermann, Chair		
II. New Business:		
A. Items for Feedback/Discussion: CESH Work Products 1. <u>Final Presentation & Analysis:</u> Access Matrix – Work Product #2 2. <u>Preview:</u> Behavioral Health, and County-funded PSH/RRH/TH Visual Map – Work Product #1	Presenter(s): Homebase	Time: 60 minutes
B. Breakout Groups: Gaps Analysis	Presenter(s): Homebase	Time: 15 minutes
C. Discussion Item: HIC Presentation	Presenter(s): SSF	Time: 20 minutes
D. Informational Item: HUD’s Stella Tool	Presenter(s): Homebase	Time: 20 minutes
E. Informational Item: Special Recruitment for SPC	Presenter(s): SSF	Time: 5 minutes
III. Review of new agenda items for next meeting		
IV. Announcements		
V. Meeting Adjourned		

For questions about accessibility or to request accommodations please contact Alicia Music at amusic@sacstepsforward.org or 916-993-7055. Two weeks advance notice will allow us to provide seamless access.

CESH System Mapping & Gaps Analysis: August Progress Report

Data Collection Phase	Description of Progress Made in August
Data Phase 3: Non-HMIS, Non-HIC Homelessness Providers	<ul style="list-style-type: none"> • 40 surveys collected from projects on the Phase 3 list. • Further clarifying questions sent to 4 projects about their funding streams and referral paths. • Qualitative interviews with Monica Rocha-Wyatt, Robert Kesselring, and Stephanie Kelly completed to better understand the Behavioral Health System.

Work Product	Description of Progress Made in August
WP 1: Visual Maps	<ul style="list-style-type: none"> • Preview of the Behavioral Health Visual Map and County-funded PSH, RRH, and TH projects completed and presented to the SPC for feedback.
WP 2: Project Access Matrix (previously “Eligibility Matrix”)	<ul style="list-style-type: none"> • 40 additional surveys from Phase 3 of data collection added to the Access Matrix. • Final version and analysis of the Project Access Matrix is presented to the SPC for feedback.
Completed Systems Mapping Work Products	<ul style="list-style-type: none"> • WP 1 – Coordinated Entry Visual Map (pg. 7-11, here) • WP 3 – Tableau Movements Analytical Tool (pg. 2-6, here)
Gaps Analysis	<ul style="list-style-type: none"> • Homebase and SSF compile SPC member feedback on the systems mapping work products to build the first draft of the Gaps Analysis Framework¹

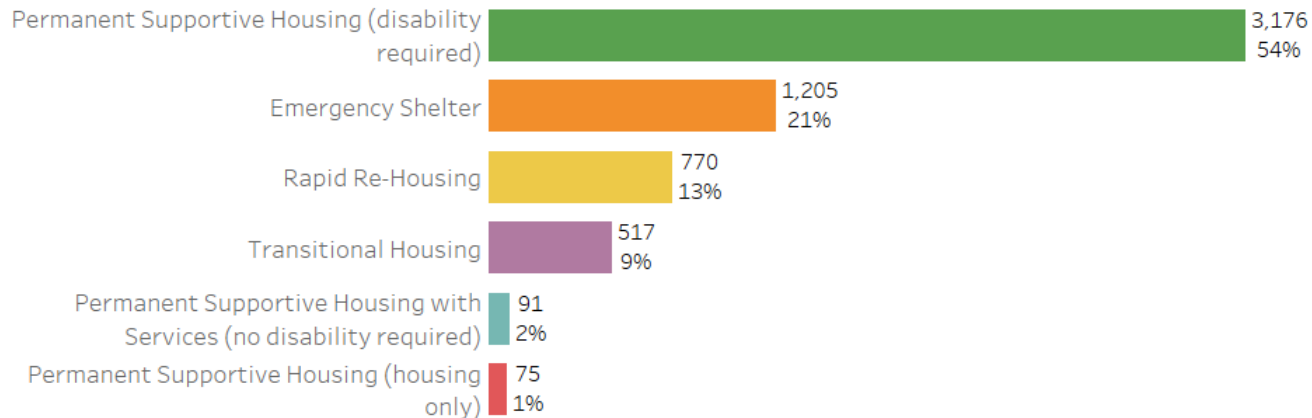

¹ This framework will be presented to the Systems Performance Committee in October, when SPC members have reviewed all of the systems mapping work products.

Sacramento Housing Inventory 2020 Summary

Total Year Round Beds	Total Family Units	Seasonal Beds	Overflow Beds
5,834	808	130	3

Sacramento Projects Matrix: Access, Referral, and Funding Analysis

Purpose

In February 2020, the Systems Performance Committee decided to focus the systems mapping effort on three elements of the system of care: access, eligibility, and client-flow. As one of three systems mapping work products, the [Sacramento Projects Matrix](#) aggregates survey responses from over 140 projects across Sacramento County with information about front door access, the process for filling vacancies, and connections to the broader homelessness system of care. This analysis explores questions like:

1. How can individuals experiencing homelessness access housing projects in Sacramento?
2. How do housing projects fill vacancies? Are they engaging in any type of prioritization?
3. Where do projects connect clients to additional housing resources when necessary?
4. How do street outreach teams and homelessness prevention programs interact with system access?

Methodology

Several homeless dedicated projects were surveyed between May and August 2020, including questions around access, prioritization, and methods for connecting individuals to housing. The number of projects surveyed is as follows.

Project Type	# of Respondent Projects	# of Projects Surveyed	Response Rate
Emergency Shelter/Interim	35	37	95%
Transitional Housing	23	24	96%
Rapid Re-Housing	21	21	100%
Permanent Supportive Housing	30	31	97%
Behavioral Health Housing	19	26	73% ¹
Prevention	7	7	100%
Street Outreach	13	15	87% ²
Housing Resource Access Points (H.R.A.P)	3	3	100%
Total	132	164	80%

Limitations to the Sacramento Projects Matrix

Collecting information about referral processes can be difficult in the context of community-wide surveys.³ For example, some agencies may have interpreted key definitions in different ways or otherwise misreported an individual project's access points, referral partnerships, or process for filling

¹ Due in part to a low survey response rate, this analysis will not include conclusions about behavioral health housing resources. Analysis of these programs will be presented in September with the Behavioral Health Visual Map.

² Two of the street outreach teams that initially received surveys did not perform the actions of street outreach to individuals experiencing homelessness so they did not complete surveys.

³ To review the survey questions, please see [this folder](#).

vacancies. As much as possible, Homebase contacted providers to request clarification and verification of each project’s information; however, there may still be cases where information in the Sacramento Projects Matrix differs slightly from current realities.

This analysis does not account for project capacity in units or beds, but rather focuses on the total number of projects. While this approach is valuable for examining how many unique processes may be in place, it does not speak to the capacity of each project relative to other projects. For your reference, the total numbers of family beds, individuals beds, total beds, and family units, as reported on the 2020 Housing Inventory Count (HIC), is included below. As a reminder, the HIC is an annual count at the end of January.

Project Type	Family Beds	Individual Beds	Total Beds	Family Units
Emergency Shelter/Interim Housing	337	868	1,205	109
Transitional Housing	257	260	517	97
Rapid Re-Housing	633	137	770	184
Permanent Supportive Housing	1,335	1,841	3,176	414
Total	2,562	3,106	5,668	804

Project Type	Survey Respondents on the HIC	Total Survey Respondents	%	Survey Respondents <u>not</u> on the 2020 HIC
Emergency Shelter/Interim Housing	29	37	78%	A Community for Peace – DV Emergency Shelter; First Step Community – Emergency Bridge Housing; First Step Community – North A Street Shelter; Midtown Churches – Pilgrimage; My Sister’s House – DV Emergency Shelter; Next Move – Meadowview Re-Housing Shelter; Shelter, Inc – North 5 th Navigation Center; Volunteers of America – Senior Safehouse
Transitional Housing	19	23	83%	Lutheran Social Services – Housing with Dignity; Turning Point – TPCP Transitional Housing; Wind – Possibilities (TH component); Volunteers of America – Veteran’s Grant Per Diem
Rapid Re-Housing	15	21	71%	Lutheran Social Services/Sacramento Self Help Housing/Sacramento Covered – City Pathways RRH; Sacramento County – Family Stabilization Program; Sacramento County – Flexible Housing Pool; Sacramento County – Housing

				and Disability Advocacy; SHRA – FUP; SHRA – P3
Permanent Supportive Housing	28	30	93%	TLCS/Hope Cooperative – Folsom Oaks; Mercy Housing – Courtyards at Orange Grove
Total	91	111	82%	

Key Takeaways

Housing

- Across street outreach, emergency shelter, transitional housing, rapid re-housing, and HRAPs 79% of projects (79 out of 100) are connecting clients to the VI-SPDAT.
 - By contrast, 54% of transitional housing, rapid re-housing, and permanent supportive housing projects (41 out of 76) accept referrals from Coordinated Entry.
- Access
 - Despite the introduction of Coordinated Entry, the process for accessing housing resources, including emergency shelter, rapid re-housing, transitional housing, and permanent supportive housing, is still decentralized and highly dependent on the project.
 - 50% of the emergency shelters open year-round (15 out of 30) require that individuals experiencing homelessness receive a referral from a community organization or entity.
 - Some projects further specify which community organizations or entities can provide eligible referrals. This ranges from law enforcement departments to mental health providers to specific homelessness providers.
 - Currently, 42% of housing projects (47 out of 113) use prioritization schemes other than Coordinated Entry when filling project vacancies. It is unclear to what extent these prioritization schemes are unified at the agency or systems level.
 - The use of this many prioritization schemes makes it difficult to understand who is being served by each project and draw systems-level conclusions about gaps in the system of care.
- Flow
 - Most emergency shelters and transitional housing projects are connecting clients to additional housing resources, reflecting a community-wide commitment to re-housing.
 - There are few consistent patterns in how housing projects make referrals to other housing resources, indicating a lack of coordination across the system and even within agencies with multiple housing projects.
 - Many housing projects reported referring their clients to housing resources that require a specific path to access (e.g., one rapid re-housing project reported making housing referrals to SSHH – Transitional Housing, but these projects only accept referrals from local HARTs).
 - Due to the high number of housing referrals and VI-SPDAT connections reported by rapid re-housing projects, these projects are likely serving both:
 - Individuals with mid-level acuity before they move to unsubsidized housing, and
 - Individuals with high acuity who will go on to another subsidized housing option following their time in the rapid re-housing project.

Homelessness Prevention

- While three small homelessness prevention programs are connected to the Coordinated Entry System, the homelessness prevention system in Sacramento is largely decentralized and available only to TAY and veterans.

Street Outreach

- Street outreach teams in Sacramento are operating on different models, including variations in the number of outreach workers, target population, caseload numbers, and geographic boundaries.
- Street outreach teams are well connected to the Coordinated Entry System and other housing resources across Sacramento.

Housing Programs

Accepting Referrals

Table 1. Referral Requirements Across Sacramento Housing Resources

	Emergency Shelters (n=35)	Transitional Housing (n=23)	Rapid Re-Housing (n=21)	Permanent Supportive Housing (n=30)
Accept walk ins	57%	52%	38%	13%
Requires outside referral	43%	48%	62%	87%

Of the 35 emergency shelters surveyed, 57% consider self-referring clients (online, in-person, or over the phone). This includes 5 seasonal winter shelters. The remaining 43% accepted clients only through referral from a qualified agency or entity, such as Adult Protective Services, City of Sacramento or Wellspace.

Of the 23 transitional housing projects surveyed, 52% consider self-referring clients (in-person, over the phone, or online), while the other 48% require referrals from qualified agencies or entities, such as specific emergency shelters, Dignity Hospital, or a local HART.

Of all 21 rapid re-housing projects surveyed, 38% consider self-referring clients (in-person or over the phone), while the other 62% require referrals from qualified agencies or entities, such as Mental Health Plan providers, emergency shelters, or the Veterans Administration.

Of the 30 permanent supporting housing projects surveyed, 13% consider self-referring clients (in-person or online), while the remaining 87% require referrals from other agencies or entities, such as Sacramento County Behavioral Health, Sacramento County Department of Human Assistance, or Housing Choice Voucher (HCV) waitlists.

- 50% target individuals experiencing homelessness with a qualifying mental health diagnosis. Many of the most complicated paths to access involved projects serving individuals with mental health diagnoses while combining a number of housing funding sources.

Prioritizing Clients for Beds

Table 2. Method for Prioritizing Clients for Beds⁴

	Emergency Shelters (n=35)	Transitional Housing (n=23)	Rapid Re-Housing (n=21)	Permanent Supportive Housing (n=30)
Prioritization scheme	43%	38%	52%	47%
First-come-first-served	40%	17%	33%	13%
Waitlist	34%	39%	14%	17%
Coordinated Entry	3%	30%	71%	50%

43% of emergency shelter projects fill vacancies using a prioritization scheme, 40% admitted clients on a first-come-first-served basis, and 34% used a waitlist.⁵ 3% took referrals exclusively through Coordinated Entry and an additional three projects (9%) participate in TAY case conferencing.⁶

30% of transitional housing projects use Coordinated Entry to fill at least some of their vacancies, while the remaining use a combination of waitlists (39%), other types of prioritization (38%), and first-come-first served (17%) to fill vacancies.⁷

71% of rapid re-housing projects use Coordinated Entry to fill at least some of their vacancies, 52% use another prioritization scheme, 33% fill vacancies on a first-come-first-served basis, and 14% used a waitlist.⁸

50% of permanent supporting housing projects accept clients through Coordinated Entry as at least one component of access. The remaining 50% fill vacancies using a combination of other prioritization schemes, waitlists, and first-come-first served.⁹

- The permanent supportive housing projects serving clients on a first-come-first-served basis require a referral from a participating case management provider.

Methods for Connecting Clients to Housing Resources

Table 3. Connections to Housing Resources¹⁰

	Emergency Shelters (n=35)	Transitional Housing (n=23)	Rapid Re-Housing (n=21)
Connection to housing using any method	91%	96%	100%
Connection to VI-SPDAT	86%	70%	90%
Connection to other housing resources	66%	70%	76%

⁴ Note: A housing project may use multiple forms of client prioritization.

⁵ The difference between first-come-first-served and waitlist depends on the capacity of the project. Projects serving clients on a first-come-first-served basis can serve clients as they present for assistance, while projects with a waitlist are not. Projects were able to select more than one category for this question, so a project could be both first-come-first-served and waitlist if applicable.

⁶ Categories are not mutually exclusive.

⁷ Ibid.

⁸ Ibid.

⁹ Ibid.

¹⁰ Note: Each project type may connect clients to more than one housing resource.

91% of emergency shelter projects of emergency shelters connect their clients to housing resources using some method.

- 86% connect their clients to the VI-SPDAT.
- 66% connect clients to other housing resources across the community, including permanent housing, transitional housing, and other rapid re-housing projects.

96% of transitional housing projects connect their clients to housing resources.

- 70% of transitional housing projects connect their clients to the VI-SPDAT, including 6 projects that only connected clients to the VI-SPDAT and not to other housing resources.
- 70% connect clients to other housing resources across the community, including permanent housing, other transitional housing, and other rapid re-housing projects.

100% of rapid re-housing projects connect their clients to housing resources.

- 90% of rapid re-housing projects connect clients to the VI-SPDAT.
- 76% connect clients to other housing resources across the community, including permanent housing, transitional housing, and other rapid re-housing projects.

Homelessness Prevention Programs

Seven prevention projects responded to the survey. 100% of respondents stated that they provide assistance with the housing search to prevent loss of housing, as well as mediation assistance. 86% also offer a rental subsidy to eligible individuals.

57% offer drop-in locations (in-person, over the phone, or online) where clients can request assistance, with the remaining 43% relying on referrals from Coordinated Entry or the SSF Navigators.

Each project had a different assessment process, including using a standardized prevention assessment, determining eligibility during staff interviews, requiring proof of loss of income, assessing need based on the VI-SPDAT score, or a mix of these approaches.

43% of prevention projects prioritized clients using Coordinated Entry, 29% used some other form of prioritization, and 29% assisted clients on a first-come-first-served basis.

- Of the 4 projects not connected to Coordinated Entry, three projects focus on veterans and one focuses on TAY.

Street Outreach Teams

13 street outreach teams responded to the survey. 62% of street outreach teams target individuals experiencing homelessness broadly, while the remaining 38% specifically target individuals with mental health conditions, unmet healthcare needs, or TAY.

69% of street outreach teams reported having drop-in physical locations where individuals could self-refer for assistance.

69% also reported operating within specific geographic boundaries, including the Cities of Citrus Heights, Elk Grove, Folsom, and Rancho Cordova, as well as specific neighborhoods with the City of Sacramento and the unincorporated areas of North and South Sacramento.

85% reported having active caseloads from 20 to 75 clients per outreach worker and 15% reported not maintaining active caseloads.

Finally, all outreach teams connect their clients to housing resources, either through emergency shelters (100%), connections to the VI-SPDAT (85%), or other housing resources (85%). In addition, two outreach teams connect their clients to the LOCUS assessment, a triage tool used to help determine the resource intensity needs of individuals who receive adult mental health services.¹¹

¹¹ More information about the LOCUS can be found [here](#).

HMIS: Housing Inventory Count (HIC)

“...designed to be an accurate reflection of each Continuum of Care’s (CoC) capacity to house homeless and formerly homeless persons.”

Housing Inventory Count (HIC)

HIC collects information about beds and units by *Program Type, that are available on the designated night.

*Program Types:
Permanent Housing Projects (PSH, OPH, PH, RRH)
Transitional Housing Projects
Emergency Shelters

Typically done once per year at the end of January.

Starting in 2019, we had to supply the HMIS project ID to HUD on the HIC, as well.

The self-reported HIC is compared to the actual inventory and clients in HMIS. We are asked to account for any differences.

ALIGNMENT IS KEY!

The **Longitudinal System Analysis (LSA)** report also dives into each program and takes **quarterly HIC and PIT counts**.

January 31st
April 30th
July 31st
October 31st

**SACRAMENTO
STEPS FORWARD**

What Projects need to report their Housing Inventory on the HIC?

HUD requires ALL inventory dedicated to serving households who are experiencing Homelessness to be recorded in HMIS. *This includes projects that are not participating in HMIS or receiving HUD funding.*

Projects include:

- Emergency Shelters
- Transitional Housing Projects
- Permanent Housing Projects***

***Permanent Housing Projects include:

- Permanent Supportive Housing (PSH)
- Permanent Housing (PH)
- Other Permanent Housing (OPH)
- Rapid ReHousing (RRH)

Beds vs. Units

Year-round Inventory is divided by Household Type:

- **Households without Children** (or Adult Only Households)
- **Households with Children** (or Family Households)
- **Child Only Households** (usually RHY projects)

Typically units equal households served.
For Adult Only and Child Only Households, the bed and unit inventory will be the same.

For Family Households, the bed inventory will typically be the unit inventory multiplied by the average household size that the project serves.

Emergency Shelter Inventory

Bed Availability:

- Year-round Inventory
- Overflow Inventory
- Seasonal Inventory

Bed Type:

- Facility-based
- Voucher
- Other

Projects with Non-Fixed Inventory: Subsidy / Voucher Based Inventory

**Rapid Rehousing
projects, some PH and
ES projects

HUD Guidance on determining inventory:

"Projects that provide housing rental assistance and have a fixed number of vouchers should determine the number of beds and units based on the number of vouchers currently funded and available for use.

Projects that provide emergency shelter or housing rental assistance vouchers and **without a fixed number of units or vouchers** (e.g., Emergency Shelter hotel/motel project, Rapid ReHousing, some scattered site PH Permanent Supportive Housing) should **determine the number of beds** (and units) **based on the maximum number of persons** (and households) who **can be housed on a given night.**"

Rapid Rehousing Projects

For Rapid Rehousing projects, the inventory that appears on the HIC report is based on program utilization. (The **Move-In Date** on the **Program Enrollment** screen.)

Recording RRH inventory in HMIS:
RRH Bed Inventories should be updated to show average bed availability during the annual reporting period.

What are we asking Housing Projects to do?

- Check their projects inventory on a quarterly basis at a minimum
- Provide corrections to their inventory to the SSF HMIS Team
- Respond to inventory inquiries from SSF HMIS Team

Report Library: Agency Management Reports **Housing Inventory (HIC)**

Housing Inventory (HIC)	Designed to report on housing stock available in a community that is dedicated for homeless persons. The report also offers a point-in-time look at utilization.	Web Page PDF Excel	Quarterly (prior to 1/31, 4/30, 7/31, 10/31)

How is SSF HMIS Team helping?

- Link to Form on the HMIS Log Screen on the side bar
 - Link to the Form is on the website under Helpful Materials
- www.SacramentoStepsForward.org

- Provided an easy to complete Google form for Housing Projects to provide corrections to their housing inventory
- Continue to provide opportunities for Housing Projects to consult with the SSF HMIS team

Q: Where can I find the form to add or change my Project's Housing inventory in HMIS?

A: [Request to Add/Change Sacramento CoC Project HMIS Housing Inventory form](#)

or

[Request to Add/Change Yolo CoC Project HMIS Housing Inventory form](#)

Other reminders:

2020 HMIS Data Standards Changes:
October 1st, 2019 marks another year
of changes to the HMIS Data

Key Take Aways for 2020 HIC

Emergency Shelters:

- More HART (Seasonal) Shelters participating in HMIS
- New project: Capitol Park Hotel
