

February 22, 2022

Dear Community Partner,

We are recruiting community members to participate in a 6-part Communities of Practice Series to increase vaccination rates to keep Californians safe and healthy. Participants who attend all six sessions will receive a stipend in the amount of \$450.

***Please NOTE: Selected members MUST ATTEND ALL 6 SESSIONS to receive a stipend at the end for their participation. ***

Though virtual, the Communities of Practice will be organized into 10 cohorts by target community or population (see listing and calendar on registration form) to understand more about COVID-19 vaccination experiences in communities with the lowest vaccination rates and in regions across the state that have historically experienced significant health inequities.

[A full calendar of Cohort 2-10 meetings WILL BE ADDED BY 2/24. Please refer to the updated calendar that will be posted on the registration link below]

Ideal participants are:

- Individuals who can attend all of the CoP dates and times for their identified cohort. (Stipends will only be provided to participants who attend all six sessions).
- Individuals who are knowledgeable on how COVID-19 vaccines have affected their community and who are able to share vaccination experiences, barriers, and need for information or resources within their community.
- Individuals who are willing to engage and participate fully and authentically as themselves throughout the process.

Visit this link to sign up and register **by 5pm Friday March 4, 2022:**
